## HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

### Allowance

1. Claims 1-21 and 27-28, now renumbered 1-23 allowed.
2. The following is an examiner's statement of reasons for allowance:

The closest art identified is U.S. Patent No. 6,525,711 to Shaw et al., which teaches a rotary haptic device in which the degree of haptic feed back is varied depending upon the force applied by the user to the device in a direction unrelated to the direction of haptic feedback. See for example Fig. 4 and 4:4-9, which points out that the representations shown in 4B and 4C are virtual rather than actual mechanical representations. Shaw teaches a virtual interaction with the applied force measured by a sensor and drive signals applied to the actuator.

By contrast, the instant application claims this variation in haptic feedback amount comes about not as a result of changes to the drive signals but as a result of the physical interaction between the rotor and the stator in which ***"the rotor is pressed onto the stator with a pressing force that is changed directly by changing the force with which the user presses the cap onto the base so that strong haptic feedback is obtained when the cap is pressed by the user with a strong force and weak haptic feedback is obtained when the cap is pressed by the user with a weak force"***. Although, it was known that piezoelectric motors require a minimum load application between rotor and stator in order to drive the rotor without slipping as described for example in JP2000245173, examiner finds no motivation to combine this knowledge relevant

to piezoelectric motors with Shaw to arrive at the claimed invention without resorting to impermissible hindsight.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ROBERT R. RAINEY whose telephone number is (571)270-3313. The examiner can normally be reached on Monday through Friday 8:30 AM to 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Amare Mengistu can be reached on (571) 272-7674. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
